ASTER LIGHT

The quality of a product is the satisfaction of the needs and expectations of the customer. Raw materials, projects, production processes combine to achieve a

certain level of quality of the product.

ASTERLIGHT always puts in work "quality system" and "quality assurance".

The objective of ASTERLIGHT is to ensure the complete satisfaction of customer needs by providing the expected quality at all stages: from the early birth of the idea, the product must be the result of a careful analysis, which is part of the real needs and expectations final consumers and intermediaries involved (designers, installers, maintenance). Within a manufacturing company as ASTERLIGHT all functions, to the extent of their competence, shall act for the harmonious development of the final product and all those that make fully satisfied the various categories involved.

ASTER LIGHT

LED LIGHTING

Why LED lighting is so important.

Are considerable advantages of this technology, the LED lamps allow a saving of approximately 50/70% compared with conventional lamps, at the same time emit more light with less heat.

LED lamps have a life expectancy greater than in conventional lamps 35000/50000h than elle 2000/3000h. LED lamps do not give light pollution as required by the CEI EN 62471

LED lamps are compact, easy to install, require little maintenance.

This technology helps to significantly reduce air pollution.

Bulbs and equipment with LED light sources can be used in any environment:

inland areas, homes, shops, hotels, retail outlets, offices, production areas, outdoor areas, facial lighting, framing, gardens, swimming pools, lighting of public areas such as roads buildings, medical facilities

ASTER LIGHT

NAVAL LIGHTING

With years of experience behind us in the lighting industry ASTERLIGHT has a staff of designers, engineers and experienced designer.

ASTERLIGHT eligible to follow a 360 ° lighting projects of any kind.

By providing:
advice
design
productive activity
installation Assistance

"Emerald Princess"

ASTERLIGHT has as objective to provide new solutions related to the lighting industry.

"Emerald Princess: Common area"

Design and production that underlie the use of environmentally friendly raw materials and energy-efficient light sources that allow you to significantly reduce the costs. Giving the customer the opportunity to save on most requested products.

ASTER LIGHT

CONTRACT LIGHTING
